

Distance of a point from plane ³⁸

$$\omega^T x = 0$$

θ = between 0 and 90

$$d = \frac{\omega^T s}{\|\omega\|}$$

$$\Rightarrow \omega^T s = \|\omega\| \|s\| \cos \theta = +ve$$

> 90

$$d = \frac{\omega^T s'}{\|\omega\|} \Rightarrow \omega^T s' = \|\omega\| \|s'\| \cos \theta = -ve$$
