

Ensemble Techniques - Bagging And Boosting

Ensemble Techniques :- Kaggle, Hackathons

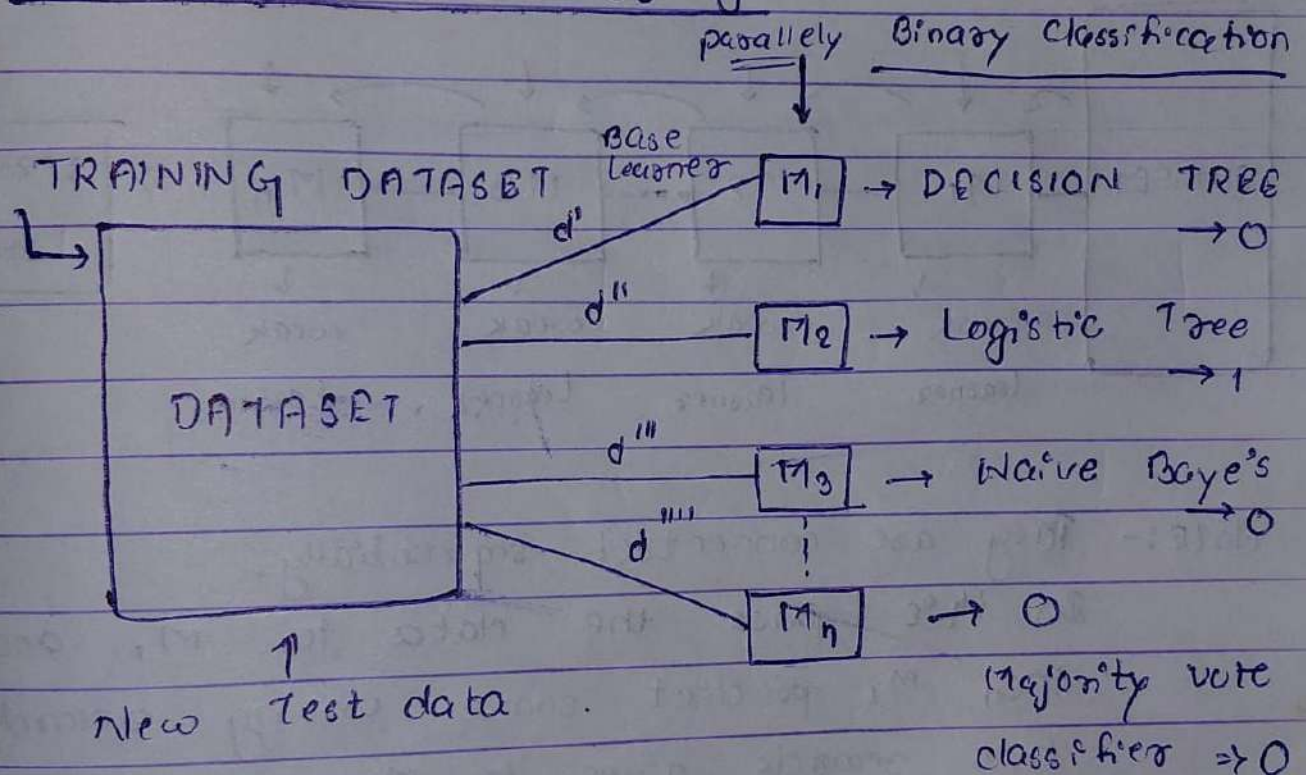

↓
Ensemble Techniques

Bagging

① Random Forest Algorithm

↳ Regression And Classification

Idea Behind Bagging

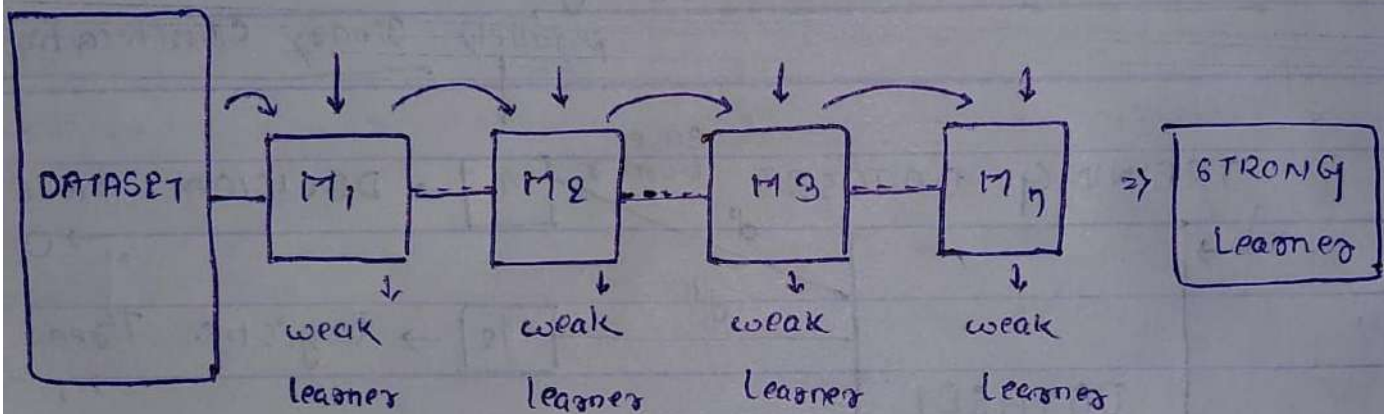

Regression
↓
Average of all o/p's

Boosting

- ① Adaboost
- ② Gradient Boosting
- ③ Extreme Gradient Boost (Xgboost)

Idea Behind Boosting

NOTE:- They are connected sequentially.

In this pass the data to M_1 and then M_1 predict some wrong record and this records gives to M_2 along with some ~~record~~ more records from the dataset and this process sequentially continuing with some n number of models. (combining multiple weak learner to form a strong learner.)
