② Skip gram – Word 2 Vec

window size = 5

O/P	I/P
→ [iNeuron, Company, Related, To]	Is
→ [Company, Is, To, DATA	Related
→ Is, Related, DATA, SCIENCE]	To

When should we apply CBOW or Skip Gram

{ small Dataset ⟶ CBOW
  Huge Dataset ⟶ Skip Gram }

* How to ~~increase~~ improve CBOW or skipgram

CBOW or Skipgram

(1) Increase the Training Data

(2) Increase the window size which in leads to increase of vector dimension.

Increase the (or) window size - vector dimension is also increasing.

Note: More the training data better the accuracy.
