Advantages

1. Intuitive
2. fixed size → vocab size
3. Word Importance is getting captured.

Disadvantages

1. Sparsity still exists
2. OOV (out of Vocabulary)

Note:

Suppose the word "good" it is appears in all the sentence so it will ignore this and in the chart we can see the value of good is 0.

It will give importance to that word which is appear once in the sentence.
