

AI Vs ML Vs DL Vs DS

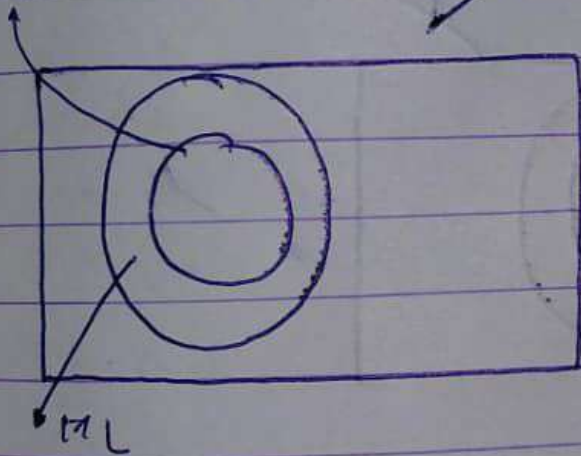

1) Artificial Intelligence

2) Machine Learning

3) Deep Learning

4) Data Science

Deep Learning

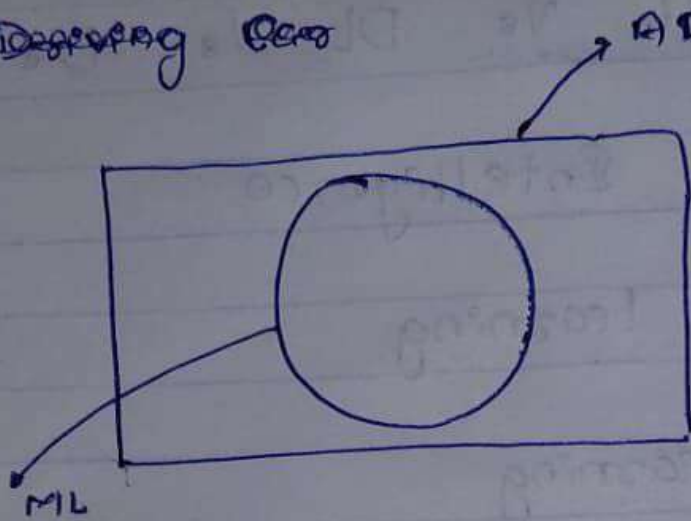

AI - To create an application which can perform its own task without any human intervention.

Ex: Netflix Recommendation System

→ Action Movies → Action Movies Recommendation

② Self Driving Car

② ~~Deep Learning~~ Deep Learning

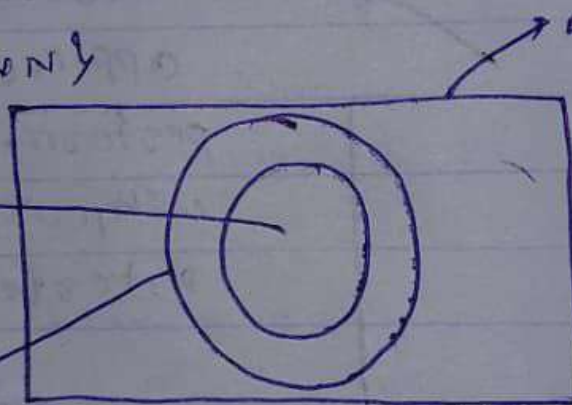

It provides stats tools to analyze, visualize, prediction, forecasting the data.

{ Multi layered NN }

Deep Learning

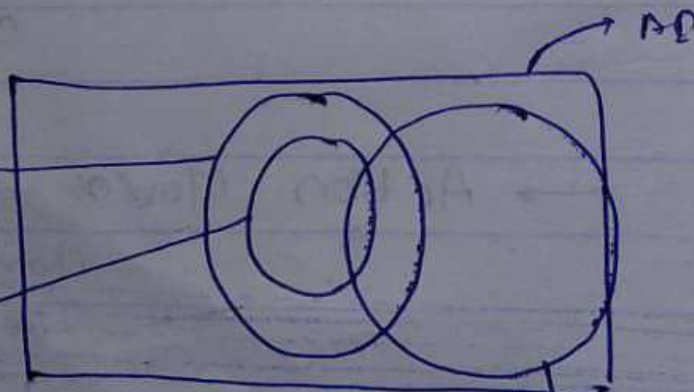

{ Mimic the Human Brain }

ML

ML

DL

Data Science
