Decision Tree Classifier

- a) Entropy and Gini Index $\rightarrow$ Purity split
- b) Information Gain $\rightarrow$ features to select for DT construction

① Purity $\rightarrow$ Pure or Impure split

$\rightarrow$ Entropy

$\rightarrow$ Gini Impurity

② what feature you need select for splitting $\rightarrow$ Information Gain

Notes • Impure split means it will split further.

• Pure split means it can't split further we get the leaf node.

• In feature selection we select those feature whose leaf node appear quickly.
