

Simple Linear Regression

60

Supervised ML $\rightarrow$ Regression

Dataset $\rightarrow$ $\nearrow$ features $\rightarrow$ $\nearrow$ $\nearrow$ or dependent features

<u>Weight</u>	<u>Height</u>
74	170 cm
80	180 cm
75	175.5 cm
—	—

Notes If we have one input feature known as simple linear regression and if we have multiple input feature then this known as multiple linear regression.

The terminology and maths which we applied in simple linear regression the same we will apply in multiple linear regression.
